Wright LINE
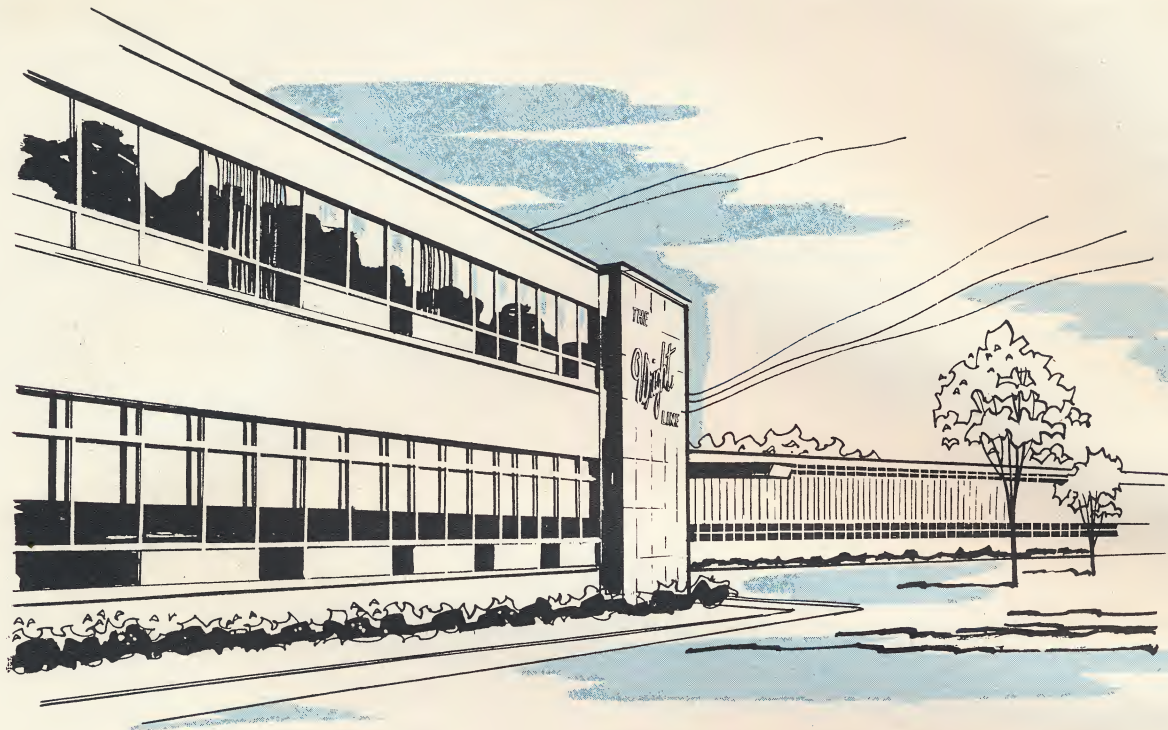

DATA PROCESSING ACCESSORIES

1965 PRODUCTS & PRICES

Since 1934, Wright Line has pioneered the development of data processing accessories. From these modest beginnings, we have had continued growth in a field which is one of the most dynamic in today's business world. Over 48 sales offices are located throughout the United States and 10 in Canada with manufacturing facilities in both countries.

Today, Wright Line offers more than 400 products used in data handling filing and storage of punched care, tape reels, desk packs and other media. We take pride in placing this important reference on data processing accessories in your hands.

GENERAL INFORMATION AND TERMS OF SALE

Pricing

Prices cover stock merchandise and packaging. Changes other than the optional changes provided for, will cost extra. Prices quoted upon request. All orders will be accepted with the understanding that prices in effect at time of shipment will prevail. The manufacturer reserves the right to make changes in color, design or price without notice.

For export shipments requiring special export packing, extra charge will be made. Some Wright Line products are shipped knocked-down and simple assembly is necessary before using. The purchaser assumes this responsibility.

All orders are subject to acceptance by the company.

Terms

30 days net from the date of the invoice, no cash discount allowed. All deliveries are F.O.B. shipping point.

Minimum Charges

Minimum amount of an order is $15.00. Orders for less than this amount will be billed at the $15.00 minimum.

Guarantee

The policy of Wright Line has been the same from its beginning—to every customer, satisfaction both in the product and in business relationships. All Wright Line products are unconditionally guaranteed for one year against defects in workmanship and materials. The Wright Punch is guaranteed for 90 days and a 1 year warranty on parts.

Materials

All equipment items shown are of all-steel construction unless otherwise specified.

Colors and Finishes

Wright Line is converting most products from standard grey to charcoal grey finish which will become our standard color in the future. There is also available at a cost of 10% over list price: IBM Red, IBM Blue, IBM Yellow, Burroughs Tan (139 and 227), NCT Tan, NCR Dark Brown, RCA Blue, Minneapolis Honeywell Beige, G.E. Tan, G.E. Green and G.E. Blue.

There will be a minimum charge involved of $20.00 and a maximum charge of $150.00. These colors will be furnished in smooth baked enamel. Delivery of products ordered in color other than that specified will be approximately 60 days.

Capacities

All capacities listed are calculated on standard of 150 cards per inch.

Damage in Shipment

Our packaging of all products complies fully with and, in most cases exceeds, requirements of Consolidated Freight Classifications. Despite the care used in packaging, damages occasionally happen in transportation.

All shipments should be opened immediately on receipt for inspection for concealed damages occurring in shipment. On discovery of such damages, stop unpacking, hold shipping container and ask delivering carrier for an inspection for concealed damages. This notification to the carrier has to be made within 15 days of receipt of shipment for claim purposes.

Any claim for damage should be made against the transportation company. Our responsibility ceases upon acceptance of shipment by the carrier, but if we can be of assistance in processing claim, please advise us.

Return of Merchandise

Please do not return merchandise for any reason without first writing us for authorization and instructions for shipment.

INDEX

A key punch desk is to a key punch as pedestals are to a regular office desk. Without pedestals, a regular office desk is only a table without any storage space. Without a key punch desk, a key punch is simply a machine with some work surface. When the desk is added, the key punch is suddenly transformed into a work station. It gives added work surface, as well as drawer space, for both blank card stock in trays and personal effects. You provide clerks with desks, don't you? Then why not do the same for key punch operators? Not only do key punch desks add efficiency and organization, but they give a degree of status to the operator's job as well.

2530-10	Utility Card Rack	7¾"	13⅝"	6½"	6 lbs.	6.00

Card handling is greatly reduced with the use of Unitrays (individual removable pockets) in Sorter Racks. Pockets of rack are removable allowing the use of feeding and receiving trays and flexibility on large sorts. No more juggling of cards by hand is needed. Although the UNITRAY system is recommended, you will also find fixed pocket equipment listed.
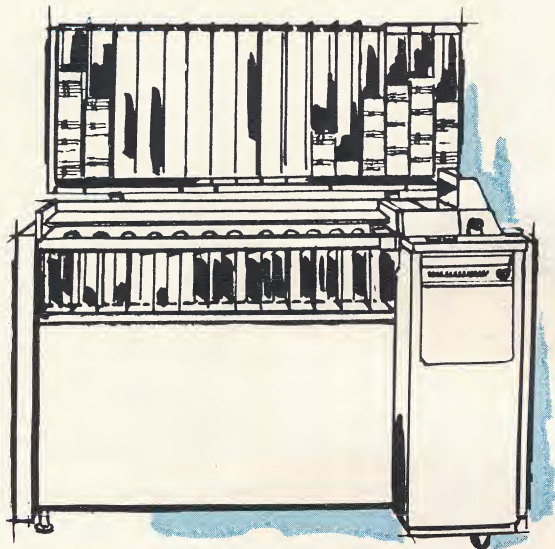

**1533-20 UNITRAY RACK
on 3508-21 Stand.**

Every pocket is removable for faster card handling. Unitrays are not included with rack and must be ordered separately.

The 1533-20 rack may be used with 3508-21 or 3521-20 brackets. The 3503-22 rack can only be used with 3521-20 brackets. Brackets cannot be used with the 083 sorter.
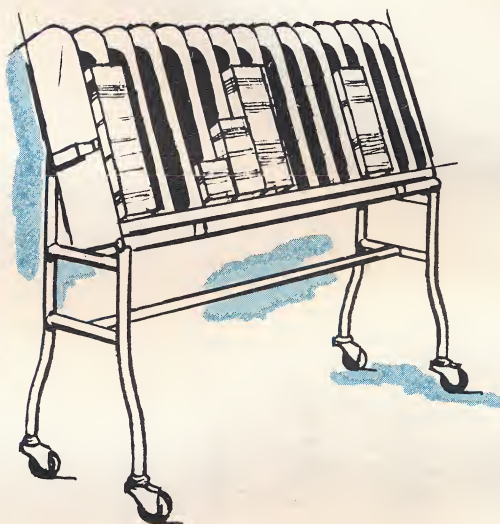

**3503-22 FIXED POCKET RACK
on 3504-10 TRUCK.**

The 1533-20 rack also fits this truck. Rack and Truck must be ordered separately.

Wright Line offers a complete selection of control panels and wires—all unconditionally guaranteed.

Panels are manufactured to exacting standards, with *sturdily constructed frames* of extruded aluminum. *Panel sections* are of black Bakelite, clearly printed with white information which is baked on for long life and readability. *Handles* are large for ease and convenience in carrying. *Covers* are formed of aluminum sheet and will not warp; matching, wear-resistant, grey paint blends covers with machines. *Full-card* labels are formed into the surface of all covers for quick identification.

All panels and wires can be ordered through Wright Line branch offices located in all principal cities throughout the United States.

**CONTROL PANEL STORAGE**
For the storage of control panels wiring stands and wiring stations refer to products shown on pages 8-13.

UNISTORALL is designed to give flexibility of storage of all operating supplies at machines where they are needed. They may be arranged to store control panels, cards, forms and the many needs necessary in the work area. In addition, work surface is provided at every machine and all materials are protected by the exclusive Roll-Wright, self-storing covers. Units are available for front and back access or front access only. In addition to the Model 30 and 30A shown here, larger Models 48 and 48A are shown on the following pages.

UNISTORALL join together in continuing units and desk tops may be added as wanted to give sitting height work surface. Your Wright Line representative will be glad to help you with the planning of your UNISTORALL needs as well as the overall floor planning of your department.
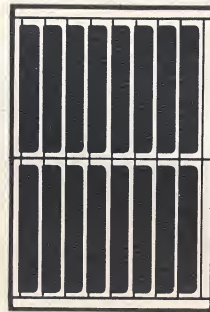

A Panel-Machine Identification Chart is shown on page 14 to allow you to convert panel numbers to machine numbers.

  ORDER:
  3 No. 5604-12 Inserts
  1 No. 5919 Spacer

When ordering, specify one case, 5530-21, plus inserts, spacers, etc. as listed for any two combinations. Example: A and A, A and B, B and C etc. As the unit is two sided, any two can be used. If alphabetic code is used, unit will be assembled as wanted at the factory.

C
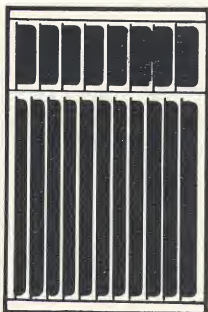

CAPACITY for one side only
- **8 911 Panels and**
  11 903 or 913 Panels or
  11 901 Panels, top, and
  8 914 Panels, bottom
  ORDER:
  3 No. 5604-12 Inserts
  1 No. 5919 Spacer

D

CAPACITY for one side only
- **8 911 Panels and**
  8 914 Panels
  ORDER:
  3 No. 5604-12 Inserts
  1 No. 5919 Spacer

When ordering, specify one case, 5530-21 with drawer, 5651-10 and inserts, spacers, etc. as listed below for any two combinations. Example: E and F, F and F, G and H, etc. As unit is two-sided, any two can be used. If alphabetic code is used, unit will be assembled as wanted at the factory.

* Order (1) when attaching Desk Top with Drawer or UNITUB to UNISTORALL
Order (2) when attaching The Same between UNISTORALLS

The UNISTORALL Models 48 and 48A are the same as the Model 30 and 30A except larger in size and capacity. Remember when ordering that UNISTORALL butt together in continuous lengths and combinations to give you complete storage requirements right at your machines at the end of each line or at breaks in a line or when attaching desk top working area, End Panel 5611 should be used to dress off the end of the unit.

A Panel-Machine Identification Chart is shown on page 13 to allow you to convert panel numbers to machine numbers.
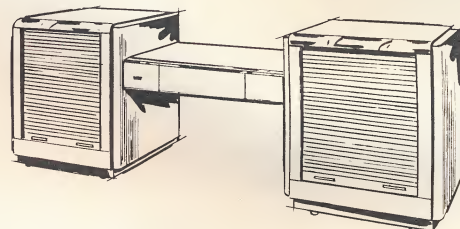

UNISTORALL DESK TOP with Drawer 5607-21
This may be used between UNISTOR-ALLS or at the end of a line of UNISTORALLS by using a 1303-21 leg. It has a plastic laminate top as well as large drawer space. This unit may also be used as a low table with 1303-21 legs or high table with 1302-21 legs.
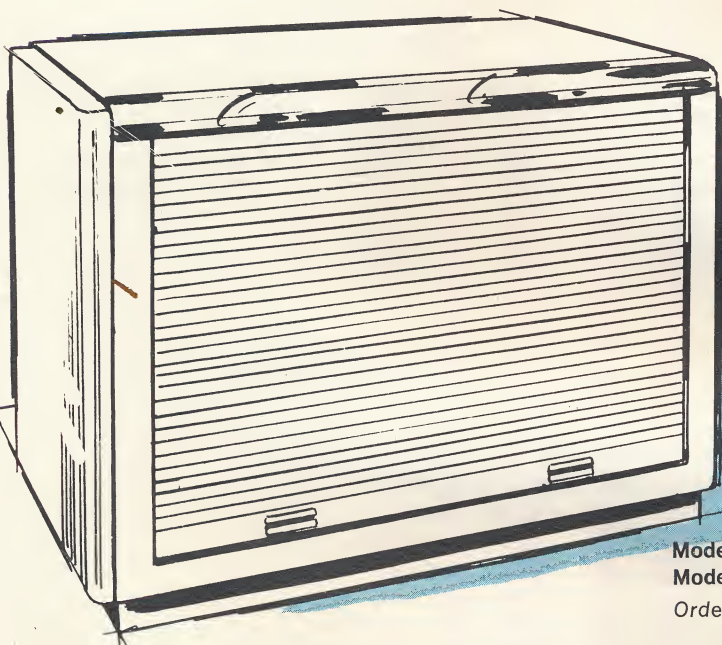

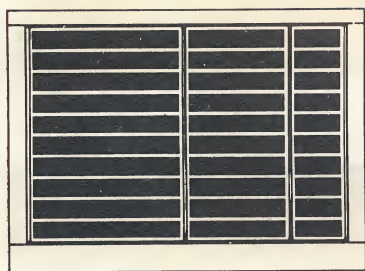

Model 48 Open front and back 5548-23
**Model 48 Open front only 5548-24**
Order End Panels separately

When ordering, specify case 5548-23 plus inserts listed below for any two combinations. Example: A with A, A with B, A with C. If alphabetic code is used, unit will be assembled as wanted.

A
CAPACITY for one side only
• 10 901 or 911
  10 912 and
  10 903 and 913 Panels
  ORDER:

 2 No. 5622-11 Inserts
  1 No. 5624 Roller

F

CAPACITY
- **16 914 Panels**
  Stored with handles up and
  16 908 Panels
  Stored with handles front
  ORDER:
  1 No. 5623-11 Insert
  2 No. 5622-11 Inserts
  2 No. 5624 Rollers

For UNIVAC 1004 Panels
The model 48 or 48A may be equipped to store 1004 Panels by ordering either case plus 2 5625-10 Inserts, 1 5642-10 Shelf and 2 5624 Rollers (only 1 for the 48A). Capacity: 14 panels.

Models 48 and 48A
May be equipped with shelves for the storage of cards, forms, panels, and other operating supplies. Order case wanted and from 1 to 10 shelves. Use shelf 5640-11 for models with 3 or less shelves. Shelf 5642-10 should be used for models with 4 or more shelves. Your Wright Line specialist will be glad to help you with your requirements for shelf storage models.

Tape Tray 5603-12
Capacity: 30 Carriage tapes

Wire Trays
5601-12 and 5610-11
Compartmented for wires, jacks, plugs and all your wiring needs.

CONTROL PANELS
for use with IBM machines and the UNIVAC 1004 are available from Wright Line. Order your panel and wire requirements through your local Branch Office.

Full utilization of today's high-speed data processing equipment depends on fast and efficient card handling at both input and output stations. The UNITRAY System is the answer. Here is the only complete card handling system to take care of all needs, from machine processing . . . to physical reference . . . to semi-active or inactive storage.

Each tray is compact. Light-in-weight and made for easy carrying. UNITRAY was specifically designed to a length of 22½" to accommodate a workable selection of cards . . . up to 3000 . . . and still provide the ultimate in convenience for the operator.

UNITRAY is a processing tray, too! It's a removable pocket of the sorter rack which can be used on any machine close to feed and stacker. UNITRAY speeds up processing.

UNITRAY is a system for use throughout the entire department. It can be used as an individual compartment of a truck . . . a tray in a storage cabinet . . . or as a drawer in a file. All trays are interchangeable to give you the maximum flexibility and save valuable time.
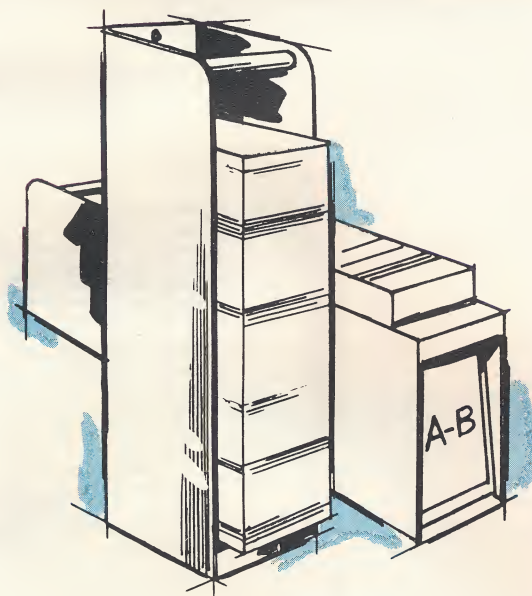

Over 1,000,000 UNITRAYS are in use in more than 14,000 departments throughout the world. That's positive proof of the benefits offered only by the UNITRAY system.

Products using UNITRAYS are found under Sorters, Files, Storage and Trucks in this catalog.

Gold Star card handling systems eliminate heavy, cumbersome trays that serve *only* as file drawers. They save you valuable time—for, with Gold Star systems, the entire tray of cards can be removed from the file and used right at machines as a feeding or receiving tray. And every tray is interchangeable in all Gold Star equipment—4, 12, 20 drawer units and transfer files—for flexibility in physical reference, machine processing and semiactive filing.

What's more, today's Gold Star Files look and perform better than ever. For, we've added new stainless-steel handles to eliminate unsightly paint wear and strengthened the trays to provide greater rigidity, too. There is full card labeling and every tray is a self-stacking tray.

Wright Line full suspension files offer an innovation in top grade files. In addition to the 22 drawer model, there are 30, 24 and 15 drawer models with a Wright Line development, the three wide cradle. With this 50% more capacity is available at every opening. All cradles have touch-release opening which automatically opens drawers. Full card labeling and stainless steel handles make these files quality constructed throughout.

In addition you will find UNITRAY File for high capacity vertical filing, UNISTOR-ALL Custom Files as well as 2 drawer and 1 drawer files.

Here are Tub Files to fill your every need. Exclusive Roll-Wright, self-storing covers keep material under lock and key as well as being protected from dust. Tubs are available in standing and sitting heights and may be joined together in groups of 2, 3 or more to form continuous working units. Exclusive Wright Line features such as the Roll-Wright self-storing cover, stainless steel protected wear areas are standard on units as shown. Rolling posting shelves are available at extra cost.

A complete line of Data Processing Binders —for active or inactive reference, temporary or permanent storage—is available through Wright Line. There are styles for both burst and unburst forms in all sizes—with top-quality vinyl and pressboard covers. All have guaranteed long-life nylon posts or nylon cable, large capacities, strong hinge mechanisms, and labeling as desired. And all open fully without center bind for easier reading.

HOW TO ESTIMATE THE
WORKING CAPACITY OF FILES

In estimating the working capacity of a file, figure the number of guides needed and allow 40 to an inch for 25 point grey pressboard guides, 55 to an inch for 16 point buff guides, and 100 to an inch for 11 point white guides and 50 to the inch for 20 point black pressboard. In addition, allow approximately 1" per compartment tray or drawer to provide for easy back and forth movement of guides needed in reference and pulling. Files that are too tightly or loosely filled, slow up the operator.

CUSTOM GUIDING SYSTEM SERVICE

WRIGHT LINE personnel are trained to help you with your guiding requirements. They can offer exclusive Custom Guiding Systems to you.

For standard or special guiding systems call your Wright Line representative and let him analyze the problem. He will give you a complete proposal of ideas and costs for this custom work.

New, rounded-top Mylar "Rip-Proof" tab which offers better finger grip and will not crack, tear or peel.
Formed slot for easier insertion of inserts.
Two-side indexing.
Mylar "Rip-Proof" tabs are perfectly formed to hold inserts securely, and show indexing clearly. Thinner Mylar means less bulk—savings of 10" per thousand guides used.
Durable, rigid pressboard that can really take it holds index straight.
Holes in guides allow you to see through and also relieve compression when tightly filed.

So Thin . . . So Strong . . . So Economical . . .
Guaranteed against Tearing,
Cracking, Warping, Shattering

- So Thin . . . Less than ⅓ the bulk of all other guides—90 take only 1" of valuable file space.
- So Strong—Made entirely of DUPONT MYLAR—50 times stronger and tougher than old-fashioned plastic. They won't tear, crack, warp or shatter. They are available in a new, modern silver color.
- So Economical . . . They will last longer than any other guide, saving cost of new guides and replacement time of refiling.
- All are insertable and reversible.

Products for CARD PROCESSING
POSTURE CHAIRS

Here is complete seating satisfaction with a choice of firm back or spring back to fit every job. All have easy to adjust controls to make personal comfort for the user. All have foam rubber cushions, curved back rest and are all steel construction throughout. Long wearing Naugahyde is used on all upholstered surfaces and all swivel casters roll easily. Seat heights adjust from 16″ to 20½″.

Wright Line's new Tape-Seal Computer Tape Storage System can double your present tape storage capacity. The heart of the system is a flexible polyethylene strip which wraps tightly around the reel flange edges sealing out dust and guarding the tape against possible pinching. A unique hook-latch device permits the tape to be suspended rather than held by wire inserts. A built-in spring loaded panel make it easier to remove reels.

Tape-Seal is 90% lighter than conventional polystyrene containers and there is no chance of breakage. A label area is provided on the surface of every Tape-Seal to give quicker, easier identification of reels.

This system is a complete system to take care of all storage from the tape library area to machine room. In addition, a truck is available for moving reels and supplies.

The design and color complements the decor of any computer department.

Although complete information is shown on the following pages, a more complete and detailed brochure is available from your local office or from Worcester.

Products for TAPE PROCESSING
REEL STORAGE

The Modular line of tape reel storage features 1, 3, 5 and 6 high frame units in 3 widths to solve space problems. These units can be used back to back or will attach together end to end in continuous lengths.

Plated inserts with spacing for $1\frac{9}{16}''$ or $2\frac{1}{16}''$ reel containers are available.

For easy assembly, modular units are made with an interlock feature. They may be used with or without end and top enclosures.

3 HIGH MODULAR
with end panels and top
This is also available in 5 high unit.
Capacity: 24 $1\frac{9}{16}''$ reels per level.
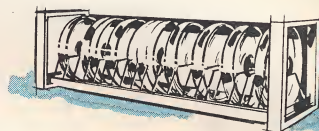

1 HIGH MODULAR
without end panels or top may be stacked on any other unit to give added capacity.
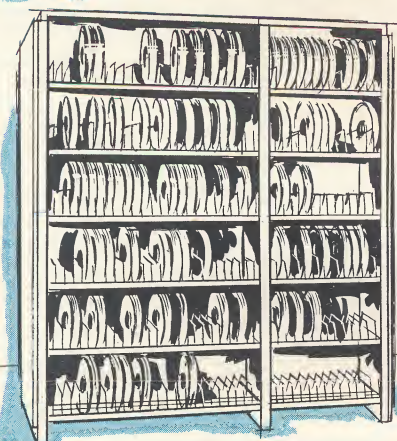

6 HIGH MODULAR
Showing a $43\frac{3}{4}''$ unit with attached $25\frac{1}{4}''$ unit.

ORDERING INFORMATION

BACK PANEL FITS ONE OPENING

TOP Width for single or double unit.

BASIC UNIT
ORDER: 2 END FRAMES (OF DESIRED HEIGHT)* No. of INSERTS TO FIT (1, 3, 5 or 6) in rack width desired and reel size needed ($1\frac{9}{16}''$, or $2\frac{1}{16}''$).

ADD-ON UNIT
ORDER 1 END FRAME (DESIRED HEIGHT)* No. of INSERTS TO FIT (1, 3, 5 or 6) in rack width desired and reel size needed ($1\frac{9}{16}''$, or $2\frac{1}{16}''$).

END PANEL
ORDER BY HGT. IF WANTED

*Single unit may be added to any unit to increase height. Example: Single on 3 high = 4; Single on 6 high = 7. For back to back units, same construction is used except that double size end panels and tops are available and should be used in place of the singles.

The Wright Punch is a precision engineered, quality constructed product, designed for versatility of use. Its portability allows on-site application almost anywhere such as warehouse inventory control, punched card stubs transactions at cashier booths, preparation of program cards, header card preparation and error correction.

Operation is extremely simple. Card is inserted from either side and is held securely during printing. Depression of any of the keys results in holes being punched in the particular column shown by the column indicator. The punching of alphabetic data or multiple codes is accomplished by holding down the space key while depressing proper keys for alphabetic information. Any number of keys may be depressed simultaneously. Two card sets, plastic cards or cards of 80 columns or less may be used.

The Wright Punch has a one piece aluminum base with scratch-proof black finish. All other parts are finished in satin-chrome.
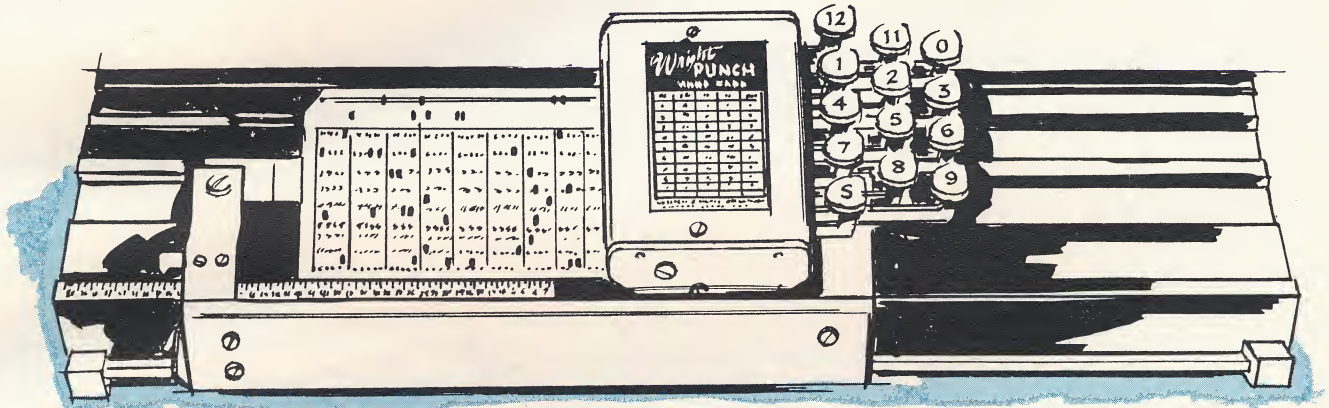

2600-00 Wright PUNCH
with black aluminum base.

2650-00 CARRYING CASE
Punch is securely held by nylon clamp. A plastic card holder for 100 cards is built-in. Case is black leatherette with plastic handle and nickel-plated hinges and latches. Rubber feet protect any surface.

Wright Line cabinets are designed specifically for the storage of I.B.M. Disk Packs. Models to hold 6 and 12 Disk Packs have full-suspension drawers that protect the disks from dust and dirt infiltration . . . eliminate the possibility of dropping them when removing them or returning them to drawers. Styled to complement the entire range of Data Processing Systems, these cabinets keep Disk Packs ready for immediate use in the computer-room environment.

All Disk Pack cabinets have full-suspension drawers with centering cups for positive protection from slipping and sliding . . . quick-identity label areas. Painted matching charcoal grey, they also feature plastic-bonded-to-steel work surfaces and stainless-steel, full-width handles and kick plates. Optional drawer colors in blue, red and yellow are available to match the accent panels on computer components.

12 PACK MODEL
This unit is also adaptable for the storage of CRAMS. For this purpose order 5826-14 plus Divider Kit for CRAM CARTRIDGES with Dust Covers 1719-01 or with boxes, 1719-03.
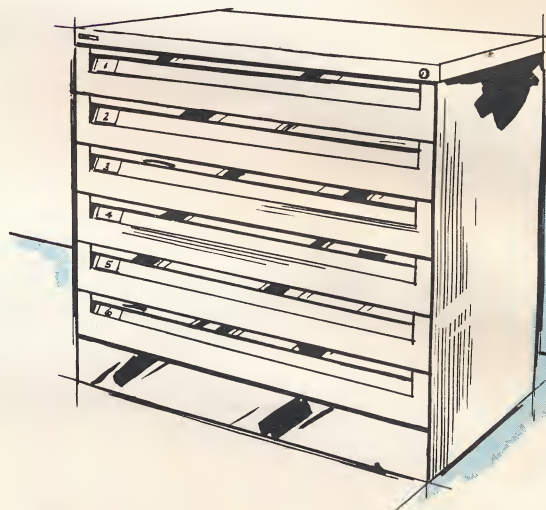

6 PACK MODEL
5825-10
A caster base 5829-10 is available for this model to give mobility where needed.

20 PACK MODEL
5833-10
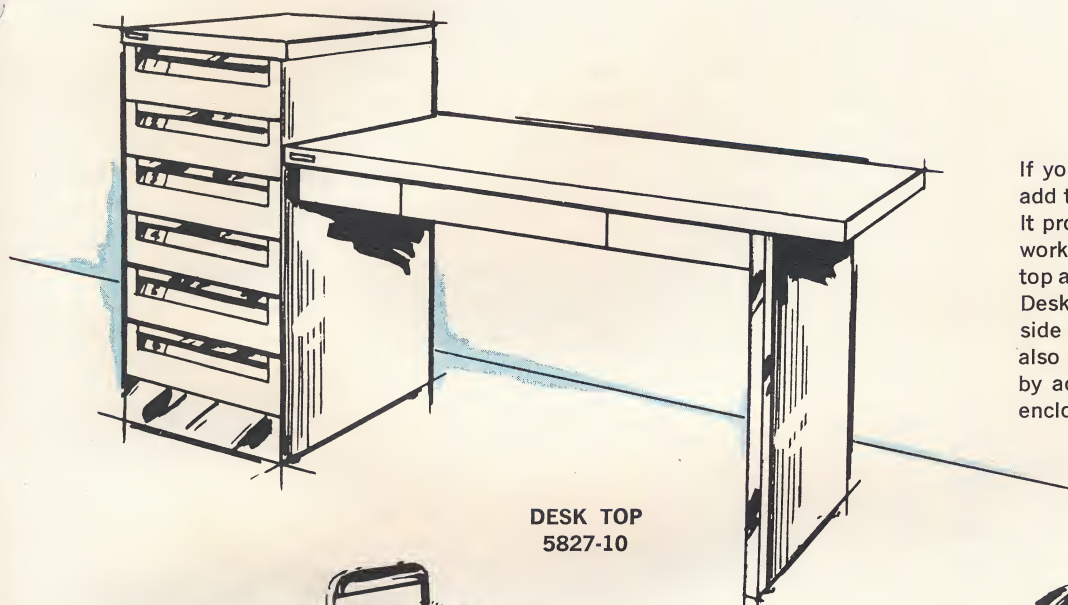

DESK TOP 5827-10

If you want a work station unit, just add this desk top with end panel leg. It provides all-important, desk-height work surface with plastic-laminate top and an additional storage drawer. Desk tops may be attached to either side of the 5825 model. Desk tops also may be used as separate units by adding legs to both ends and an enclosure panel.

CARRYING CASE 5835-10

A rigid, light weight, vinyl covered case with locks to protect DISK PACK being transported.
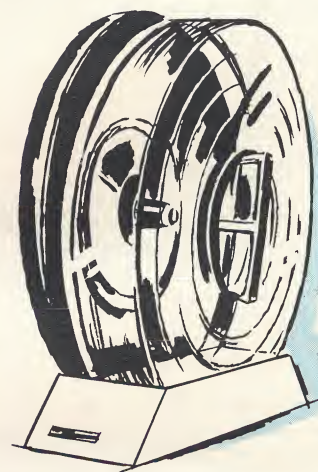

COVER HOLDER 1311-10

For use on or close to every drive to hold covers during time when the DISK is in use.

*This unit is supplied in charcoal grey with charcoal grey drawers. If you want blue drawers add suffix 11 rather than 10, for red drawers, 12 rather than 10 and for yellow, 13 rather than 10.

The recent trend in the banking field to further automate check reading and sorting has brought about a definite need for equipment to further increase the overall speed and ease of document handling.

The DOCU-TRAY is the basic UNIT of this line and is used with all equipment shown on the following pages. It features an adjustable label at center top of the tray front that can be moved and locked in position by merely moving control button. Large convenient handles at either end make carrying easy. An open area in tray front permits the removal of small sized checks, which otherwise might be inaccessible.

Many of the products shown on the previous pages for Card Processing and Computer departments are used in conjunction with the Check Handling equipment on the following pages. Do not overlook the equipment shown on these other pages when considering your needs.
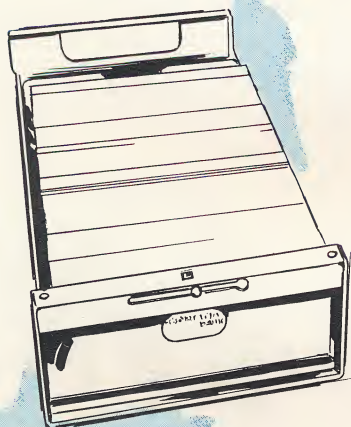

1430-12 TRAY
(For IBM, NCR-PB, and G.E.)
1430 -14 TRAY
(For Burroughs)
Capacity: 3400 Documents
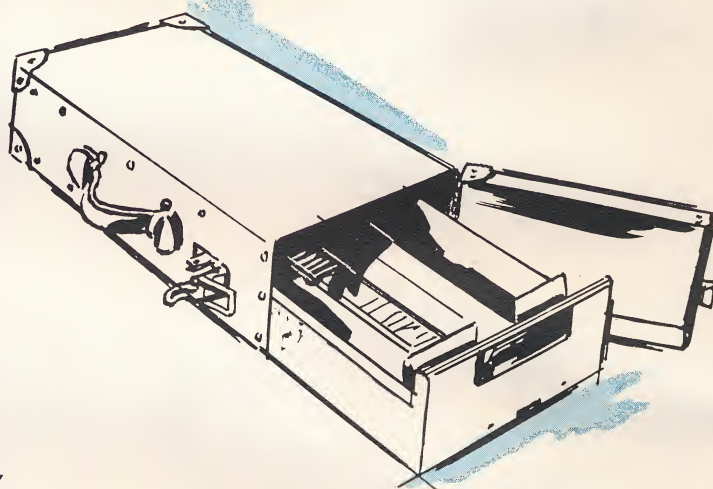

1437-10 CARRYING CASE

1443-10
AUXILIARY CHECK TRUCK
A mobile stand holds 6 DOCU-TRAYS and will fit up close behind the G.E. or N.C.R.—Pitney-Bowes Sorter. Two units are usually used for this operation.
Order trays separately.
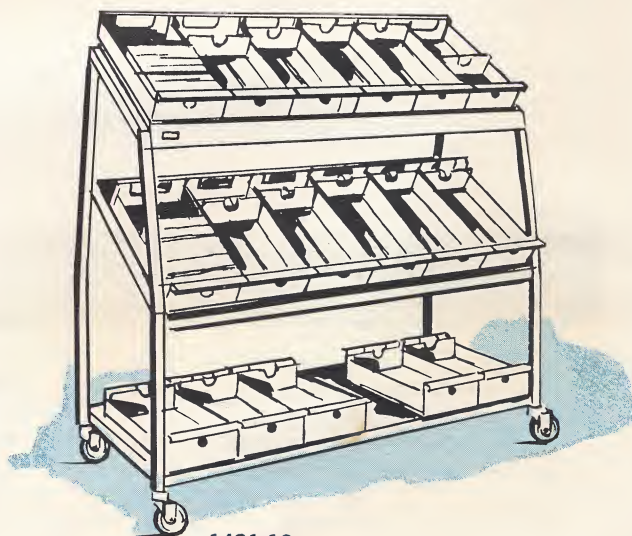

1431-10
TRUCK
Capacity: 18 DOCU-TRAYS
For use close to machine feeds and for receiving documents after processing.
Order trays separately.
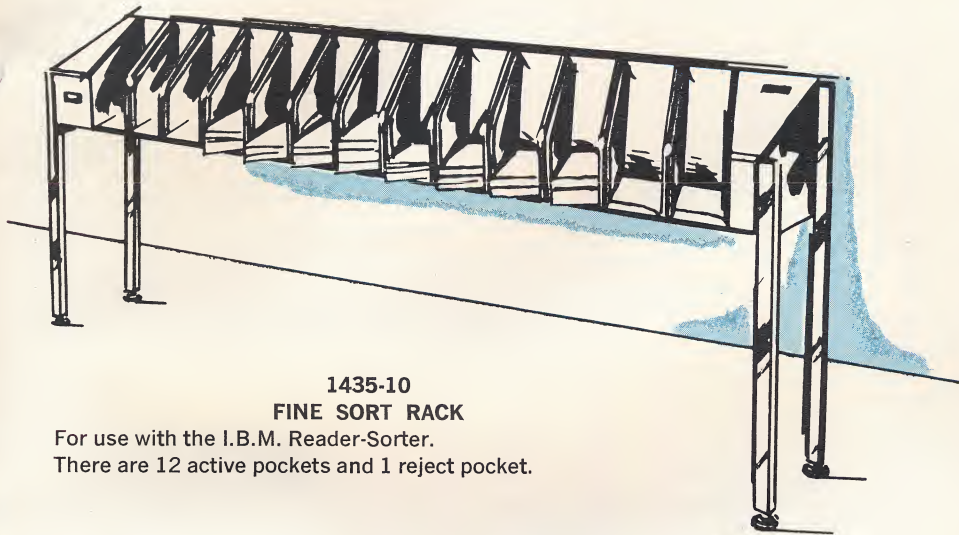

1435-10
FINE SORT RACK
For use with the I.B.M. Reader-Sorter.
There are 12 active pockets and 1 reject pocket.
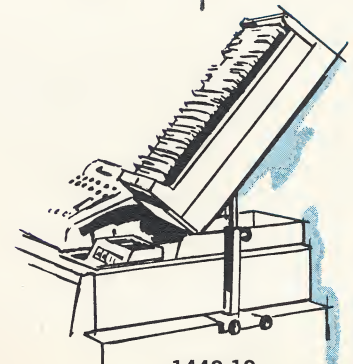

1440-10
ENCODER RAMP
Attaches to either leg of encoder within easy reach of operator, to allow faster feeding and collecting of documents.
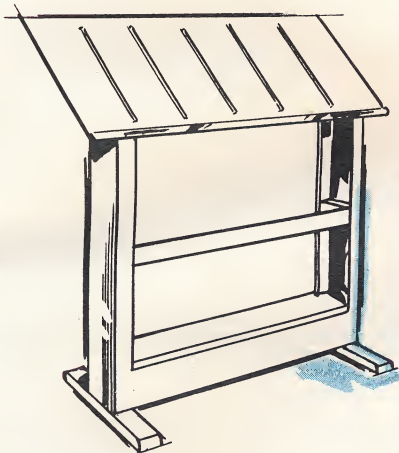

1433-10 RACK
Rack as shown consists of one 1433-10 Rack mounted on a 3508-21 stand. This will hold 6 DOCU-TRAYS. Two units should be used with Pitney-Bowes National. For use with Burroughs, the 1433-10 will clamp to fixture on rear of Sorter.
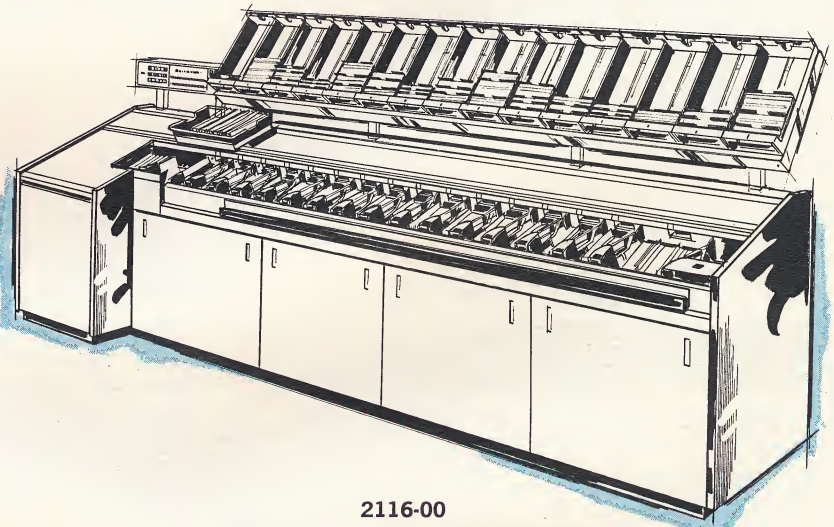

2116-00
BURROUGH'S 116 SORTER RACK
The Sorter Rack as illustrated on the Burroughs 116 Sorter has been engineered jointly with Burrough's Corporation and will fit precisely the cavities designed into the sorter. It provides for the use of 15 DOCU-TRAYS, 1430-14 to facilitate the handling of large volumes of checks.

For further information

Although complete information on our products is listed on the preceding pages, separate, more detailed brochures are available on the following products for the asking:

Key Punch Desks and Accessories
Control Panels and Wires
Gold Star Files
Tape-Seal Computer Tape Storage System
Disk Pack Storage
Wright Card Punch
DOCU-TRAY Check Handling Equipment.

If you would like any or all of these brochures, they may be obtained from your local Wright Line Branch Office or from the Main Office at 160 Gold Star Boulevard, Worcester, Massachusetts 01606.

If you are starting a new data processing department, thinking of rearranging your present department or moving to a new location, maybe we can help by supplying you with a Planning Guide with 3-D models of equipment, layout sheet and instructions. A call to your local office or note to Worcester will bring this information to you.

Ask for the Wright Line Planning Guide.
